

Etc...COFFEE CORNER MENU

Varietals... *also known as 'straights', contain only the very best arabicas which are obtained from a specific area, resulting in a distinctive coffee brew with a flavour that reflects the unique environment of that region*

Kenya Arabica AA

Grown primarily in the central region of Mount Kenya, these arabicas produce a rich, brisk-bodied coffee with a snappy wine-like after taste. Fragrant and floral, the Kenya AA coffee is sharply acidic and intense

Blends... *are mixed varietals from two or more of the world's leading coffee growing areas, carefully selected to complement and enhance each other's qualities*

Mocha Java Blend

Aromatic, heavy-bodied Mocha arabicas combined with full-bodied acidic Indonesian Java and Central American beans to create this world famous blend. A classic balance taste, aroma, acidity and smoothness

Dark Roasts... *feature the pleasant, spicy taste and hearty body of the finest coffees as they are roasted longer than commercial ones to a deep dark brown*

Decaffeinated... *premium arabica beans using the patented Swiss Water TM Process, a 100% natural decaffeinating process using pure water and carbon filters to remove caffeine in the beans whilst retaining the full flavour of the coffee*

Decaf Espresso

For coffee lovers who prefer the deepest full-bodied coffee taste of premium Columbian and Central American beans with a distinctive intense taste but decaffeinated

Espresso Spoken Here... *if you think that Espresso is just Espresso, take a close look again. The Espresso movement has generated a language of its very own. Here is a glossary of our etc...common Espresso slang to guide you through our Espresso experience*

Macchiato

An Espresso 'marked' with a dollop of foamed milk

Espresso

An intense full-bodied cup of coffee using pressurized hot water to extract the full flavour of the dark roasted beans
